UNIVERSITY PARK, PA – August 2, 2010 – Penn State University has commenced construction on the 57,000-SF addition to the 40-year-old Moore Building. Situated at its prominent northwest campus location adjacent to the famous and historical Nittany Lion Inn, the project, designed by KlingStubbins, will consolidate the University's psychology programs, which are currently spread throughout the 1.5-square-mile campus. PJ Dick, Inc., is serving as construction manager.

The consolidation will provide programs such as the Child Study Center, the Psychological Clinic, the Center for Language Sciences, and the Center for the Treatment of Anxiety and Depression with flexible laboratory and ancillary spaces to better support and advance synergies for varied research and outreach initiatives.

KlingStubbins' design of the addition interweaves sustainable principles into all facets of design and construction. The project's visible location and adjacency to other signature structures on campus provides the ideal framework for the addition to create a welcoming public face for the renowned department.

KlingStubbins provides professional services in all major disciplines within the realm of architecture, engineering, interiors, planning, and landscape architecture. The firm consists of over 400 professionals in its Philadelphia, PA; Cambridge, MA; Raleigh, NC; San Francisco, CA; Washington, DC; and Beijing, China offices. Its areas of market focus and specialization include Corporate/Commercial, Government, Science + Technology, Higher Education, Hospitality/Entertainment, Institutional/Civic, Mission Critical, and Healthcare. The company is a global leader in sustainable design and an innovator in project delivery.

KlingStubbins can be found online at www.klingsubbins.com.
