Project Management

Our Project Managers are licensed architects and engineers who act as the primary client contact and project team leader from the inception of the project through the design and construction phases. They control the project scope, schedule, and budget as they interface with the design team, client, and contractor. We seek project managers who have a track record of successfully collaborating with discipline team leaders to manage complex, program-driven facility designs in the high tech, R&D, pharmaceutical, corporate, and Federal government arenas while delivering high-quality service to the client.
